

Questionnaire on the regional specific annexes to the Recommendations for Decision-making on Municipal Wastewater.

This questionnaire aims at facilitating the discussions at the regional partnership meeting on the regional (unique Wider Caribbean) annex to the Recommendations for Decision-making. It would be appreciated if the respondent in answering each of the following questions tries to indicate the special Caribbean conditions which are decisive for a certain alternative or option.

Name:

Function/position:

Organisation:

Country:

Email address:

1. Do you consider the alternative technical options, as mentioned in the Recommendations , appropriate for the Caribbean situation? (**prevention of pollution, on-site treatment and use, off-site transportation, natural treatment systems, re-use options**).
2. Do you consider the financing options, as mentioned in the Recommendations, appropriate for the Caribbean situation? (**cost recovery systems, willingness to pay surveys, investment loans and grants, public-private partnerships**).
3. Do you consider the design of institutional arrangements as mentioned in the Recommendations, appropriate for the Caribbean situation? (**River basin solidarity, flexible regulation, task distinction between operator, regulator and owner, synergies between sectors, competition, devolution and subsidiarity**).
4. Do you consider the wider stakeholder involvement in all phases of wastewater management and the initiating of new partnerships as mentioned in the Recommendations, appropriate for the Caribbean situation? (**during the identification phase, the planning phase, the implementation phase and the enforcement phase**).
5. Do you consider the linkage between socio-economic developments, integrated approaches and wastewater management as mentioned in the Recommendations, appropriate for the Caribbean situation? (**physical/land use planning, economic developments -such as tourism, urban extension, aqua-culture, etc., integrated water resource management, integrated river basin management, integrated coastal zone management**).
6. Please indicate which aspects are missing in the Recommendations or which aspects need improvement, especially in relation to the Caribbean situation.
